INTERNSHIPS

Intern dentist, *Faculty of dentistry mansoura university*
11/2025 – 11/2026 | Mansoura, Egypt

- Assisted in performing dental examinations and recorded patient medical and dental histories in a clinical setting.
- Provided support during restorative dental procedures such as fillings, crowns, and root canals under the supervision of licensed dentists.
- Conducted preliminary dental screenings and diagnostic imaging including X-rays to aid in treatment planning.
- Educated patients on oral hygiene practices and preventive care tailored to diverse age groups including pediatric and geriatric patients.
- Maintained strict adherence to infection control protocols and dental ethics to ensure patient safety and a sterile clinical environment.
- Implemented preventive dentistry initiatives by educating patients on oral hygiene and dietary practices to reduce the incidence of dental diseases.
- Applied knowledge of dental materials to assist in the preparation and handling of restorative materials during clinical procedures.
- Collaborated with dental team to manage pediatric and geriatric patients, adapting treatment approaches to meet specific developmental and aging-related needs.
- Assisted in mastering dental materials applications during clinical procedures to enhance restorative treatment outcomes.
- Participated in diagnostic skill development using radiographs and imaging techniques for improved treatment planning.

EDUCATION

Mansoura university, Mansoura, *Bachelor of dentistry*
10/2020 – 07/2025 | Mansoura, Egypt

- Comprehensive study of oral anatomy, physiology, and pathology to understand dental structures and related diseases
- Hands-on training in dental procedures including restorative treatments, extractions, and root canal therapy
- Mastery of dental materials and their applications in clinical dentistry for effective patient care
- Knowledge of preventive dentistry practices to promote oral health and hygiene in diverse patient populations
- Development of diagnostic skills using radiographs and other imaging techniques for accurate treatment planning
- Understanding of dental ethics, patient management, and infection control protocols to ensure safe clinical environments
- Applied principles of occlusion and temporomandibular joint (TMJ) disorders in clinical diagnosis and treatment
- Techniques for pediatric and geriatric dental care tailored to specific developmental and aging-related oral health needs
- Integration of digital dentistry technologies including CAD/CAM systems for designing dental prosthetics and restorations
- Study of pharmacology related to dental treatment and pain management

- Training in patient communication strategies to improve case acceptance and manage dental anxiety

ACHIEVEMENTS

Restorative dental treatments including fillings, crowns, and root canals
Performed over 70 restorative dental treatments including fillings, crowns, and root canals with a 98% patient satisfaction rate.

Preventive dentistry programs
Implemented preventive dentistry programs educating over 90 patients on oral health and hygiene leading to a 20% decrease in cavity incidence.
